

Co-curricular Activities

NCRD's Sterling Institute of Pharmacy aims at preparing the students for the practical world where the success is not measured by means of their academic performance alone. Hence our Institute's co-curricular activities train the students for the future time and to develop a sense of competitive spirit, co-operation, leadership punctuality and team spirit.

The Institute has started Co-curricular Seminar Series for students since inception of the Institute. Renowned personalities from the Pharmaceutical Industry, Various Universities and institutes are invited to conduct the seminars and related programs.
